KILDARE DENTAL CENTRE

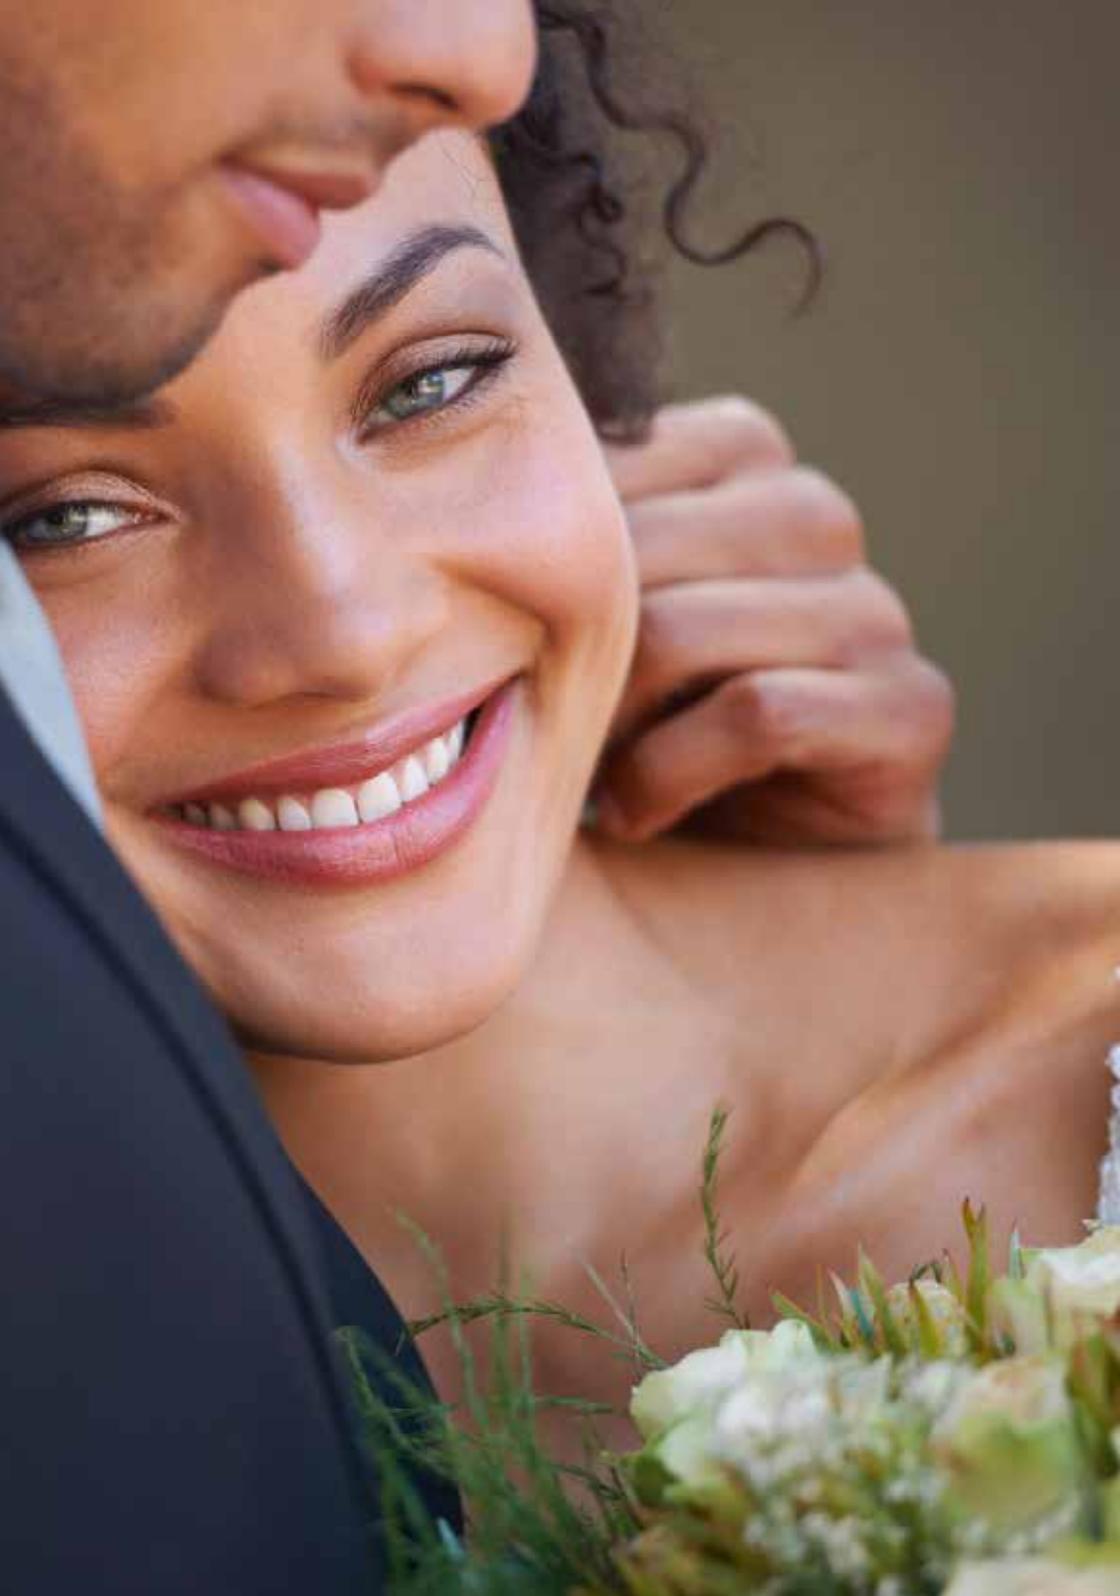

# What is Advanced Cosmetic Dentistry?

**Cosmetic dentistry is generally used to refer to any dental work that improves the appearance of a person's teeth, gums and/or bite.**

## TREATMENTS INCLUDE:

- Smile transformations/makeovers
- Teeth whitening
- White fillings/Metal-free crowns/Veneers
- Complex mouth restorations
- Unique 'Look 10 years younger' service
- Cosmetic crowns and bridges

**For all these cases, and much more...  
We can help.**

# Smile Transformations

**Our Cosmetic team are world class in the service they deliver. We are renowned for the beautiful smiles we create and help people regain their confidence and youthful appearance.**

The importance of a great smile cannot be overstated – it is the first thing that many people will notice about you and will aid your confidence and demeanour in business or social interactions. Our team can help make you look up to 10 years younger through a range of cosmetic treatments and whitening

options to give you a dazzling Hollywood smile in just two hours.

We design our treatments around each individual person's needs and design smiles that will not only transform your appearance but also your quality of life.

## IF YOU SUFFER FROM:

- Lack of confidence in smiling
- Discoloured/yellow teeth
- Twisted teeth
- Chipped or worn teeth
- Old crowns or bridges
- Gummy smile
- Missing teeth
- Aged or sunken face
- Gaps between teeth

**We can help.**

# Michelle's Advanced Smile Transformation

“ Thank you so much for everything you have done. I never thought I would have the confidence to smile but you gave me my confidence back. ”

# “Look 10 Years Younger” Service

**It is often said that the eyes are the windows to the soul. At Kildare Dental Centre we believe that your smile, your teeth and gums, are also a reflection of how you feel overall.**

Many people don't realise how much of an impact their teeth have on their whole appearance. Worn-down and missing teeth can shorten the face, causing unwanted creases, wrinkles, thin lips and a sunken look that make you look much older than you feel. Discoloured teeth, old, obvious dental work and chips or injuries to the teeth can also age your face. We offer a wide range of restorative and cosmetic dental work combined with facial rejuvenation treatments.

Kildare Dental Centre is one of the leading clinics for facial and dental transformations, and our aim is to make you look and feel younger and to be healthier as quickly and painlessly as possible. Every treatment is bespoke to the needs of the individual patient - there is no “one size fits all” approach, but we believe we can help all patients feel younger and better about themselves.

## TREATMENTS MIGHT INCLUDE:

- Porcelain veneers
- Porcelain crowns
- Tooth whitening
- Dental implants
- Full mouth reconstruction
- Bone grafts

# Kevin's Confident Smile Makeover

“ I feel a lot more confident both in my personal and professional life, as a result of the treatment. ”

# Jurate's Six Month Smile & Orthodontics

“ I feel happy because I can finally smile again. The perfect smile has changed my life, as people around me can see it, how perfect my smile is. ”

# Teeth Whitening

**Do you have stained teeth that make you feel self-conscious about smiling? Teeth whitening can be a good solution for certain types of tooth staining.**

Teeth can be stained by foods, drinks, smoking and certain medications. Teeth whitening is a safe procedure that can lighten the colour of your teeth by using a safe dental bleaching agent. Individual results vary based on your initial tooth colour and the nature of your staining.

Your teeth are whitened in the dental chair. A protective barrier is placed on your gums and lips, and a gel is placed

on your teeth. A lamp is positioned over the teeth and this activates the bleaching process. After one hour you can expect your teeth to look a few shades brighter and is a popular choice with many patients who have an important event coming up and want to look their best.

# White Fillings

**Choose a white filling material that matches the shade of your surrounding natural teeth.**

You can also have any existing metallic fillings replaced with tooth-coloured or 'white' fillings. This will allow you to smile without a metallic glint in sight, giving your teeth a more natural appearance overall. Here is how white fillings work:

This is a safe procedure that entails the removal of any decay from your tooth, and taking out the metal or amalgam fillings if you are having them replaced.

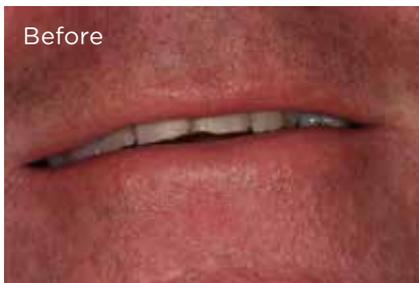

The new filling is made from a very hard tooth-coloured substance and will withstand the forces in your mouth when you bite and chew over a long period of time.

The restoration is completed in one visit and your fillings will not be visible when you smile.

# Implants For Missing/ Chipped Teeth

As advanced cosmetic and orthodontic dentists, we can apply the latest cosmetic techniques to finalising your orthodontic care to a high and visually pleasing standard. Our clinic offers a family-friendly service with a wide variety of orthodontic treatments for adults and children of all ages.

The state of the art facilities available at our dental clinic enable the team to treat any orthodontic case, no matter how complex.

# Gaps Between Teeth

**If you long for straight teeth, but are put off by metal braces, short term cosmetic brace systems and Invisalign braces might be the perfect solution.**

Invisible braces are clear, removable and comfortable, it won't interfere with your life. Invisible can help to treat a variety of orthodontic problems including teeth which are crooked, crowded or with gaps.

These clear braces are particularly suitable for adults and teens who would

want perfectly straight teeth but would be conscious wearing braces.

Invisible braces are custom made to fit your mouth using a clear plastic; the braces or crowded teeth and improve the way your gums fit.

# Empathetic care & sedation for nervous patients

**We have a unique approach to counteract any fear people may have of dental treatments. We care about providing exceptional customer service.**

Are you afraid of dentistry? You no longer need to be afraid of visiting the dentist. Come to Kildare Dental Centre and lose your fear of dentistry forever.

Our staff understand that visiting the dentist can cause extreme anxiety and even prevents some customers from getting the treatments they need.

The Dental staff are highly experienced in dealing with nervous or anxious patients and will work with you to provide complete pain free care in

a calm and caring environment with personalised sedation techniques.

No-one is rushed at our clinic; we like to take our time with patients, working to the pace of the patient not the dentist.

## WE OFFER:

- Gentle approach
- Pain free dentistry
- Dental Phobia certified dentists who have all the latest training and techniques
- Needle free dentistry
- Drill free dentistry
- Relaxing environment
- No limitations on your time with the dentist
- Empathetic Sedation
